

Integra Type-R Expo Official Tech Inspection Form

All Drivers

Please bring this form to the on-site tech inspection at ITR Expo, which is held during registration in the paddock the evening before the event begins. All vehicles that will be on the track will be subject to and must pass the on-site technical inspection.

If you have any questions regarding this form, or the requirements to pass this inspection, please contact the event organizer, lead instructor, and/or safety steward for clarification (safety@itrexpo.com). Please be mindful of your fellow drivers – any cars that have not gone through tech inspection the evening before the event will be inspected the morning of the event. This may cause drivers who have not passed tech to miss track time and/or may cause some delays in the track schedule.

PLEASE NOTE: Each driver must submit their own tech inspection form, even if multiple drivers are using the same car.

The following items (next page) must be in compliance in order to pass the on-site technical inspection. You will place demands on your car that far exceed those encountered in normal street driving. You will be required to repair or replace defective or worn items at your own expense prior to being allowed on the track.

Additional requirements for passing the safety and tech inspection can be found at:

<http://itrexpo.com/rules.php>

Integra Type-R Expo Official Tech Inspection Form

Driver Name:

Vehicle Specifics (Make, Model, Year):

Year:

Color:

Car Number:

Run Group (Novice, Intermediate, Advanced, Instructor, Staff):

Braking system:

- fluid is clear, reservoir is full
- brake pedal is firm
- all brake lights are working
- master cylinder - no leaking fluid or corrosion
- calipers - no leaks
- pads are less than half worn
- rotors show no signs of cracks, discoloration or unusual wear

Suspension and steering systems:

- wheel bearings are tightened to specification
- minimal play in steering linkage
- shocks - no leaks
- bushings and pivot points show no signs of deterioration
- wheels are not bent or cracked
- lugs are tightened to specifications
- tires are appropriate size, type and speed rating for car and adequate tread remains to complete the event

Drivetrain:

- engine supports show no signs of cracks and are secure
- hoses are smooth, tight and firm
- belts are snug and have no cracks or fraying
- coolant system is full
- throttle linkage cables and cranks are functioning smoothly
- battery is secured appropriately
- throttle return springs are working properly
- all wiring is properly harnessed
- clutch functions smoothly without slipping
- axles have no excessive play
- transmission has no leaks and shifts properly
- exhaust is functioning properly
- CV joints have boots in place with no leakage and make no noise
- there are no fluid leaks: oil, coolant, or transmission fluid leaks

Driver and Instructor safety:

- original DOT belts are in good condition for vehicles without approved roll-over protection and stock-type seats or
- a 5 or 6 point harness system in good condition is employed for cars with non-OEM roll-over protection and approved fixed back seats (see safety rules for additional information)
- Seat belts, harnesses, seats, and roll bars/cages are properly secured
- Driver and Passenger seating and restraint systems are identical in design/safety
- If 5 or 6 point harnesses are used, they are not frayed or damaged
- if an optional fire extinguisher is installed, it is mounted securely
- roll bar / cage is in place for open roof cars (roadsters/convertibles/etc), or the vehicle is acceptable based upon the factory provided roll-over protection

Other:

- windshield has no large cracks
- windshield wipers function properly
- left side and rear view mirrors are secure
- optional pedal covers are secure
- center caps are removed from wheels
- body panels are secure
